Questions to consider when purchasing a pet containment system

12 Plus Correction Levels	Does the collar/receiver have over 12 different correction levels and to ensure the most Gentle Training Possible?
Integrated Remote Trainer	Does the system have a remote trainer that works with the fence equipment?
Auto Adjust – On The Fly	Does the collar/receiver auto-adjust itself to the correction level your pet needs - when it needs it?
D.M.™ Signal Technology	Does the transmitter use D.M. signal technology? Not A.M. or F.M., but D.M. (Digital Modulation) - the safest signal technology in the industry.
Programmable Correction Zone	Does the collar/receiver have a Correction Zone that will change programs and correction levels while your pet is moving through the fence signal?
Programmable Fail Safe Zone	Does the collar/receiver have a Fail Safe Zone that recognizes when your pet is moving through the signal field at a high speed?
Rubberized Soft Comfort Contacts	Is it an option to use Completely Rubberized Contacts to protect sensitive skin?
Soft Spring Loaded Contacts	Does the collar/receiver have Soft Spring Loaded Contacts to reach through long fur and maintain contact while the neck muscles expand and contract?
Three Omni-Directional Antennas	Does the collar/receiver have Three Omni-Directional Antennas for the most consistent reception?
12X Battery Check™	Does the collar/receiver run a complete battery scan every two hours?
No-Run-Through Programming	Does the collar/receiver have an adjustable No-Run-Through program setting?
Flashing Low-Battery Light	Does the collar/receiver have a Flashing Low-Battery Light?
4 Frequency Reliability	Does the system have 4 frequencies to choose from in case your neighbor installs a fence or if there is interference from CATV and satellite TV lines?
StabiliTemp™	Does the system have a feature to keep the signal stable during climate changes?
PerfectMatch™	If you have more than one pet does the system allow for separate sensitivity, correction level and programming settings?
Wire Check™	Does the system automatically adjust the power output to adjust for wire length or any wire problems and keep the signal field constant?
Wireless Electronic Switching	Do the transmitter and receiver use fail safe Electronic Switching for programming? (Rather than a cheaper magnetic system)
Lightning Monitor & Alarm	Does the transmitter have a Lightning Monitor and Alarm?
Compatible With Most Brands	Is the transmitter/receiver compatible with other brands?
Change Correction Levels	Can you Change Correction Level Settings simply at the touch of a button?
Lightning Arrest Technology	Does the system employ modern surge protection made by an industry leading company (Rather than old fashioned lightning rods)?
Money Back Guarantee	Does the dealer offer a 100% Money Back Containment Guarantee?
Independently Certified Training	Is the trainer Independently Certified to boundary train pets?
Built in the U.S.A.?	Is the product Built in the U.S.A.? (Rather than manufactured overseas (China))

If You Find A More Advanced Pet Containment System Than A Pet Stop® Pro Hidden Fence, We Will Buy It For You!
